SUNAMI

500 free sunami tokens have been credited to all site users. The official pre-sale of the SUNAMI token has begun at a price of $0.05 USD. You can purchase SUNAMI tokens using 100 different types of cryptocurrencies. The token price will double during the second stage of the pre-sale. Seize this golden opportunity; it is projected that the price of the SUNAMI token will exceed $5 after it is listed on global exchanges.

SUNAMI

The sunami token is designed for use within the Sinbad social network, its integrated marketplaces, and the Sinbad exchange. Furthermore, the token will be listed for trading on various global cryptocurrency exchanges. Additionally, the sunami token can be used for staking, allowing users to earn rewards on both the Sinbad social network and the Sinbad exchange platforms. Sinbad is a multi-platform messaging network where users can create groups, pages, forums, blogs, and marketplaces. Users can set up marketplaces on Sinbad to sell both new and second-hand products. Sinbad enables users to share messages, photos, videos, GIFs, stickers, posts, and audio files; publish stories; conduct private or group voice and video calls; and host public live streams. ICO Roadmap

The SUNAMI coin belongs to the Sanbad social network, which was developed by the Amazon Plus AI team. The pre-sale is currently underway, covering up to 30% of the total SUNAMI token supply. Once this 30% threshold is reached, the pre-sale will conclude, and the token will be listed and launched on several major global exchanges, as well as on our own new exchange. Furthermore, SUNAMI tokens can be traded, transferred, and managed within the marketplaces, pages, and wallets of the Sanbad social network. Stay tuned for exciting news!
